

Greetings Parents,

It has been a pleasure to teach the 5th graders Spanish this year. It is hard to believe that our school year has come to an end already. During the third quarter the students learned how to identify and say their numbers 0-2000 in Spanish. They combined their knowledge of months and numbers in order to be able to say their birthdays and ages in Spanish. During the fourth quarter, the students learned where Spanish speaking countries are located on the map, focusing on the Spanish speaking countries of Central America and the Caribbean. The students did a scavenger hunt around the classroom where they discovered the capital city, flag and currency that belong to each country. They also explored how children live in different Spanish speaking countries through on-line videos. If you would like to see more about these lessons, please access your child's Spanish google classroom where our lessons are posted.

Have a safe and fun summer vacation,

Katherine Millar
